CDW AI Model Managed Services

Run AI with Confidence. Prove It at Any Time.

Independent Auditing for Production AI

CDW AI Model Managed Services delivers 24x7 monitoring and operational support for AI models across any environment: on-prem, colo, hybrid and cloud. This is combined with independent third-party auditing and reporting so you can prove regulatory and governance compliance in live production environments any time.

What You Get

- **24x7 Production AI Model Management & Monitoring:** Continuous oversight of models, agents, and chatbots with rapid triage, escalation, and remediation support.
- **Independent Third-Party Auditing:** An external validation layer that provides the separation auditors expect for credible, defensible attestation.
- **Audit-Ready Evidence on Demand:** Automated, time-stamped audit trails and compliance reports generated in hours, not weeks.
- **Framework-Aligned Monitoring:** Pre-mapped controls and reporting for NIST AI RMF, ISO/IEC 42001, FedRAMP, HIPAA, and other regulatory standards.
- **Expert Production Operations:** A managed services team that continuously monitors production models, resolves issues, and improves operational controls over time.

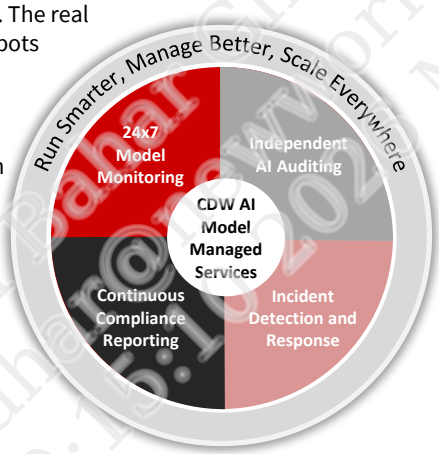
Finding the Right Solution

Most organizations invest heavily in building and deploying AI. The real risk begins after deployment, when models, agents, and chatbots operate in live environments under regulatory, security, and business scrutiny.

CDW AI Model Managed Services is built for this postproduction phase. We act as a 24x7 extension of your team to monitor production AI, detect issues early, and respond quickly, while maintaining independent audit evidence as your environment evolves.

CDW is a trusted managed services partner across all environmets Our teams combine AI operations and hybrid engineering expertise to support programs from initial rollout through long-term production operations, continuous auditing, and ongoing optimization.

CDW AI Model Managed Services supports your organization wherever you are on your AI journey, from first production models to enterprise-scale environments that must stand up to audit.



Bottom line: Always-on production operations with independent validation, delivered as one managed service.

Operate with Confidence | **Compliance with Assurance** | **Access 24x7 Expertise**

CDW + AI Continuous Monitoring

CDW AI Model Managed Services is built for AI operations across cloud and hybrid environments, delivering continuous monitoring, incident response, and production support while generating time-stamped evidence and compliance reporting as part of normal operations.

What we deliver:

- **24x7 Production Operations:** Always-on monitoring for models, agents, and chatbots in live environments, with defined on-call coverage for rapid triage, escalation, and remediation support to minimize downtime and reduce business risk.
- **Audit-Ready Reporting Built In:** Continuous evidence capture and automated audit trails created during day-to-day operations, so compliance packages and executive-ready summaries can be generated in hours without manual compilation.
- **Independent Auditing Capability:** Third-party validation that provides credible separation and defensible attestation, supporting audit requests, board reporting, and regulator expectations in high-scrutiny environments.
- **Operational Rigor at Scale**: Standard runbooks, alerting and response workflows, and continuous improvement cycles that strengthen controls over time and keep pace as your AI footprint grows across teams, clouds, and use cases.

CDW

Managed Services Overview

As one of the largest managed services providers in the market, CDW offers seamless and continuous managed support for AI workloads across on-prem, colo, hybrid and cloud environments. Our managed support services can be customized to the specific needs of your organization and support any phase of the program lifecycle.

AI Model Managed Services	Included
Operational Stability & Reliability	✓
Support & SLO-backed Incident Management	✓
ServiceNow ITSM Integration	✓
AI Resource Optimization	✓
Cost Tracking & Savings Recommendations	✓
Technical Account Manager (TAM) Support	✓
Regular Architectural Consultations	✓
On-Demand Elastic Engineering Expertise	✓
Model Audit and Compliance Framework	✓
Audit Evidence Generation & Risk Scoring	✓
Security Remediation	✓
