Claude AI Orchestration

GitHub Sync

Claude CoWork / Desktop / CLI

EXISTING RAILS (LIVE) SIT ON TOP OF THE NEW FOUNDATIONAL SUBSTRATE BELOW

NEW — MEMBER / SOCIAL INTELLIGENCE SUBSTRATE · BUILD · V1 · THE MOAT

Compounds **member SME judgment + relationships** into a durable institutional asset. Every interaction writes to the substrate; the substrate re-weights routing on the next cycle.

pipeline-monitor ADAPTS

Agent · session start, /sync-pipeline

Live pipeline dashboard. In V1, surfaces routing matches and substrate signals alongside stage status.

team-analyst (PMTF) ADAPTS

Agent · /scout + /diligence Stage 2A

Team-first PMTF. Founder Claim Verification. Commitment Depth. Output lands on the deal card's Team section.

market-analyst ADAPTS

Agent · /scout + /diligence

Structural discontinuity, independent TAM/SAM/SOM, market timing. Lands on deal card Market section.

competitive-positioning-analyst ADAPTS

Agent · /scout + /diligence

Competitors, incumbents, positioning, moat inputs. Lands on deal card Competition section.

technology-analyst ADAPTS

Agent · /scout (light) + /diligence

Thin wrapper detection, TRL, IP/patents, architecture signals. Lands on deal card Technical section.

risk-analyst ADAPTS

Agent · /scout (light) + /diligence Stage 2A

Regulatory, exit landscape, execution + market risk. Cross-cutting overlay on the deal card.

pricing-analyst ADAPTS

Agent · /diligence Stage 2A parallel

Pricing maturity, value-prop, channel margin compression, unit economics. Feeds the financial chain.

forecasting-analyst ADAPTS

Agent · /diligence Stage 2B

McMurry-method 5-yr Bear/Base/Bull with mandatory *because* clauses. Founder Financial Literacy.

venture-analyst ADAPTS

Agent · /diligence Stage 2B

Valuation (3 methods), exit projection, 35% IRR hurdle, 10x-5yr check, deal structure recommendation.

Network Agent V1 · NEW

Agent · NL directory queries · member graph

Conversational search over the member directory. *"Who knows [company]?"* / *"Who has [domain] depth?"* Returns ranked members + reasons.

Match Engine V1 · NEW

Agent · every new deal + stage advance

Routes each deal to the 3–5 best-fit members by expertise + network + pattern fit. Re-tuned by the learning loop every cycle.

SME POV Capture V1 · NEW

Agent · stage-entry prompts

Structured prompting that captures member SME judgment at the right moments. Threads to the deal card; writes to the ledger.

nwai-investment-framework LIVE

Skill · 10 reference docs on demand

Loads NWAi proprietary frameworks: gates, scout questions, rubrics, DD checklist, AI moats, formats. Encoded into V1 Policy Layer.

Document Skills LIVE

Skills · docx · pptx · pdf · xlsx

Polished Word reports, 4-slide PPTX memos, PDFs in NWAi formatting. At V1, these become exports of deal-card state.

github-sync LIVE

Skill · auto-triggers after changes

Commits and pushes every generated report and config to GitHub. Version control on every output.

TechGroup Framework Reference Docs		✓ LIVE · ENCODED IN V1 POLICY LAYER
	Universal Triage Framework v2.0 3 hard gates · NWA Filter · Opportunity 6x/30 · Readiness 5x/25 · Track A/B extension

- 3 WorkTech & Vertical Enterprise OS
- 4 Data Sovereignty, Security, Trust
- 5 FinTech (incl. Real Estate)

 Structural Discontinuity

Is this a genuine, irreversible market shift — or incremental improvement dressed as disruption?

 Memory Lock-in

Does the product get smarter and stickier the more it's used? Data flywheels & switching costs.

 Agent-Era Readiness

Does the founder solve the problem *as AI agents will reshape it*? The plain test for every deal: does the agent wave help or hurt this company?

★ **V1 Activation Surfaces — where members live**

 BUILD · V1

★ **Social Deal Card · CENTERPIECE**

One persistent card per active deal across all 7 stages. Deal essentials · *why this landed in your feed* · who's engaged · one-tap actions (I'm in / ping me / I know this founder / I know this space) · threaded SME POVs · agent analytical sections inline. Replaces "check the pipeline every two weeks."

 Activity Newsfeed

Landing surface when a member logs in. Personalized by sector / geo / portfolio. Deal activity · portfolio updates · events · milestones · support exchange. Not a chronological firehose.

 Directory + Network Agent

Faceted search over the member graph + NL queries. "Who knows X?" "Who's in NYC next week?" Two-hop intro paths. Travel + geography flags.

 Member Profile + Expertise Graph

Owner-editable + system-derived. Role · firm · expertise tags · prior employers · investment preferences · per-field privacy. Co-investment graph · decisions-ledger track record · expertise centrality. The foundation that makes 200 members visible and routable.

© **NON-NEGOTIABLE INVESTING CRITERIA — EACH GROUP DEFINES ITS OWN EQUIVALENT SET**

TechGroup — Hard Pass criteria. Any single failure = Kill.

✓ LIVE · ENCODED IN V1 POLICY LAYER

NWAi TechGroup's current criteria. Each group contributes its domain-equivalent set when its playbook is built (V2 rollout).

 Deal Structure

Equity. Priced round (Seed–Series A). No SAFEs. Convertible debt OK. C-Corp only.

 Geography

US-based HQ & IP. Executive team US-based. No foreign-owned entities.

LIKELY SHARED

 Traction

Real revenue or signed paying customers. No research projects or demo labs.

 Stage / TRL

MVP complete. At least one successful beta. TRL 5+ (GAO scale).

GROUP-SPECIFIC

 Syndication

Credible lead investor. Clean cap table — no structural red flags.

LIKELY SHARED

 Return Potential

10× in 5 years minimum. TAM must support a 20×–100× return path.

LIKELY SHARED

GROUP-SPECIFIC

GROUP-SPECIFIC

V1 changes the bi-weekly group meeting from *activation event* → *decision ritual*. Activation happens continuously between meetings via the substrate. By the time the meeting opens, members are already engaged and DD teams are already forming. The conversation moves up a level.
